Corsec Documentation Services

Ensure Solid Fundamentals for Your Certification

Corsec's **Documentation Services** are the cornerstone of a successful certification effort. They encompass documentation creation and submission, as well as clarification, defense and advocacy. All of these are completed within a system of assured quality that includes client engagement, Corsec's peer-to-peer global quality panel review, and issue advocacy with the lab and the scheme. Our documentation services include the following:

FIPS 140-2

- Non-Proprietary Security Policy
- Finite State Model
- Submission Summary
- Vendor Evidence Document
- Master Components List
- Software/Firmware module descriptions
- Source code listing for all software and firmware within cryptographic boundary
- Description of module roles and services
- Description of key management lifecycle
- Algorithm Conformance certificates
- FCC certificates for EMI/EMC compliance

Common Criteria

- Security Target Document
  - Conformance Claims
  - Extended Components Introduction
  - ST Introduction
  - Security Objectives
  - Security Requirements
  - Security Problem Definition
  - TOE Summary Specification
- Configuration Management Documents
  - CM Capabilities
  - CM Scope
- Secure Delivery Document
- Flaw Remediation
- Development Documents
  - Security Architecture
  - Functional Specification
  - TOE Design
- Guidance Documents
  - Operational User Guidance
  - Preparative (Installation) Procedures
- Testing Documentation
 - Coverage
  - Functional Tests

UC APL

- Diagram of Test Environment
- System Description
- STIG Questionnaire
- IPv6 Letter of Compliance
- SF-328 Form (certificate pertaining to foreign interests)
- Self Assessment Report (SAR) against current STIGs
- Coordinate and author Deployment Guide

Corsec's **Documentation Services** are the cornerstone of the certification effort. They encompass documentation creation and submission, as well as clarification, defense and advocacy.

Guidance and Management

We create the requisite documentation from our understanding of our clients' products. We recommend a certification direction which is backed by a peer-to-peer technical review panel. Finally, we address questions, comments, and interrogation from the Labs, the Governments, and advocate particular positions/issues on behalf of our clients.
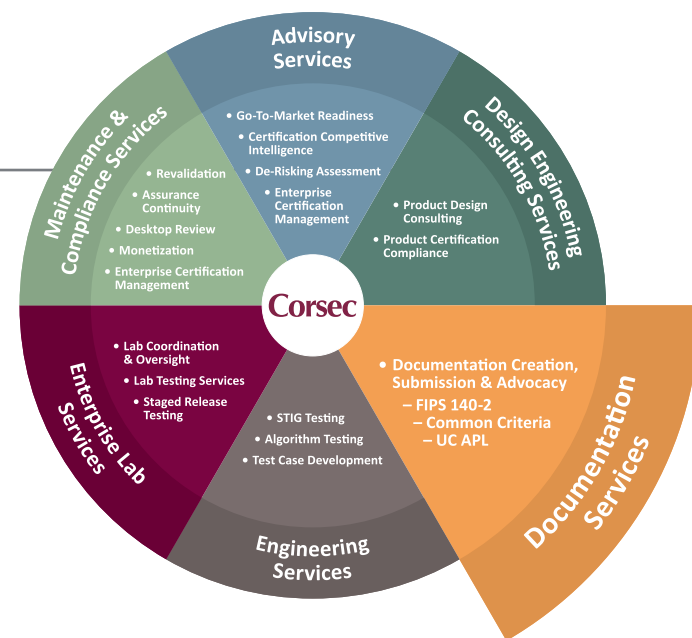

Why Corsec?

Corsec is the global leader in providing access to new markets via IT security validations. With the largest staff of experts in the industry and a comprehensive solution that spans consulting, documentation, testing, enterprise lab services, and strategic product roadmap planning, Corsec has secured more than 350 FIPS 140-2, Common Criteria and UC APL certifications for hundreds of organizations on five continents over the last 15 years.
